Scouting App Data Export Guide

A guide for exporting scouting data out of a scouting app, helping users save, sort, and file scouting notes in a form that others can read.

Farm / unit: _____ Date: _____ By: _____

1. Open the app and choose the date range
2. Pick the fields to export
3. Choose a file format
4. Save the export with a clear name
5. Open it to check it is readable
6. Add field and crop headings
7. Store a copy with farm records
8. Share only with people who need it

YOUR NOTES

TIP Export notes before each season ends so you still have them if the app changes.
