Aquaculture Wildlife Predation Control

An aquaculture wildlife predation control guide listing steps to protect fish ponds and tanks from birds, otters, and other predators using lawful, practical methods and is free to print.

Farm / unit: _____ Date: _____ By: _____

1. Identify the predators involved
2. Record losses and dates
3. Review local permit rules
4. Add netting or overhead lines
5. Use fencing where fit
6. Adjust pond design
7. Use scare devices per label
8. Rotate methods often
9. Log results

YOUR NOTES

TIP Check federal and state rules before any action against protected predators so records stay accurate.
