Native Grass Planting Guide

A native grass planting guide giving the main steps from site choice to establishment so farmers can convert fields to native cover that supports wildlife and soil.

Farm / unit: _____ Date: _____ By: _____

1. Choose the site and set goals
2. Pick a seed mix suited to local soils
3. Prepare the seedbed
4. Control weeds before planting
5. Seed per the drill or supplier directions
6. Check seed depth and coverage
7. Manage weeds during establishment
8. Mow or burn only as advised
9. Record results and follow up

YOUR NOTES

TIP Ask your local NRCS or extension office for a seed mix list matched to your soil and region before ordering.
