Species at Risk Farm Management Guide

A species at risk farm management guide with steps for learning which at-risk species live nearby and how farm practices can protect them with the help of agencies.

Farm / unit: _____ Date: _____ By: _____

1. Find species at risk in your area
2. Map habitat on the farm
3. Note timing of sensitive seasons
4. Review current farm practices
5. Choose changes that help
6. Contact agency partners
7. Look for voluntary programs
8. Document actions taken
9. Review results yearly

YOUR NOTES

TIP Ask NRCS or your state wildlife agency about voluntary programs that help at-risk species.
