Stream Restoration for Wildlife

A stream restoration for wildlife guide listing steps for planning restoration with experts so a stream supports fish, insects, and the animals along its banks.

Farm / unit: _____ Date: _____ By: _____

1. Describe the stream and its problems
2. Set restoration goals
3. Review permit rules
4. Contact NRCS and biologists
5. Develop a design with experts
6. Plan the work timing
7. Protect the stream during work
8. Plant native vegetation
9. Monitor results

YOUR NOTES

TIP Work with qualified professionals, since stream work usually needs permits and design help.
