Waste Management for Wildlife Control

A waste management for wildlife control guide with steps for handling feed waste, carcasses, trash, and manure so they do not draw pests or predators.

Farm / unit: _____ Date: _____ By: _____

1. Map where waste is kept
2. Use closed bins for trash
3. Clean up feed spills quickly
4. Store waste away from buildings
5. Cover compost and manure per advice
6. Handle carcasses per state rules
7. Fence waste areas where needed
8. Check areas often
9. Record problems and fixes

YOUR NOTES

TIP Check state rules for carcass disposal and ask your veterinarian for safe handling advice.
