# Wetland Wildlife Management Guide

A wetland wildlife management guide listing steps for assessing, protecting, and caring for wetland areas so farm owners can support waterfowl, amphibians, and other wetland species.

Farm / unit: _____ Date: _____ By: _____

1. Locate and map the wetland
2. Check local wetland rules
3. Identify main plants and wildlife
4. Control water inflow and outflow
5. Keep a vegetated buffer
6. Manage invasive plants
7. Limit livestock access
8. Avoid disturbance in nesting season
9. Monitor and record changes

**YOUR NOTES**

**TIP** Check with your NRCS office before any work in or near a wetland, since rules may apply.
