Wildlife Damage Identification Guide

A wildlife damage identification guide for matching signs on crops, trees, and structures to likely animals so farmers choose the right control before spending time or money.

Farm / unit: _____ Date: _____ By: _____

1. Photograph the damage up close
2. Note the height of the damage
3. Look at the bite or cut pattern
4. Check for tracks or scat
5. Note the time of year
6. Check for hair or feathers
7. Review nearby cover
8. Compare with extension guides
9. Record the likely cause and follow up

YOUR NOTES

TIP Confirm your guess with a wildlife biologist before picking a control method.
