Wildlife Population Trend Analysis

A wildlife population trend analysis worksheet for lining up counts across years and noting what may explain changes, so landowners can talk with biologists and is free to print.

Farm / unit: _____ Date: _____ By: _____

Species being tracked _____

Survey method used _____

Counts by year _____

Years with missing data _____

Observed trend _____

Weather and habitat changes _____

Possible reasons _____

Questions for a biologist _____

Management response _____

Notes _____

NOTES / CALCULATIONS

TIP Use the same survey method each year, and ask a biologist to help read the trends.
